KNOWING HOW
TO LIVE: THE SECRET OF
ITALIAN STYLE.

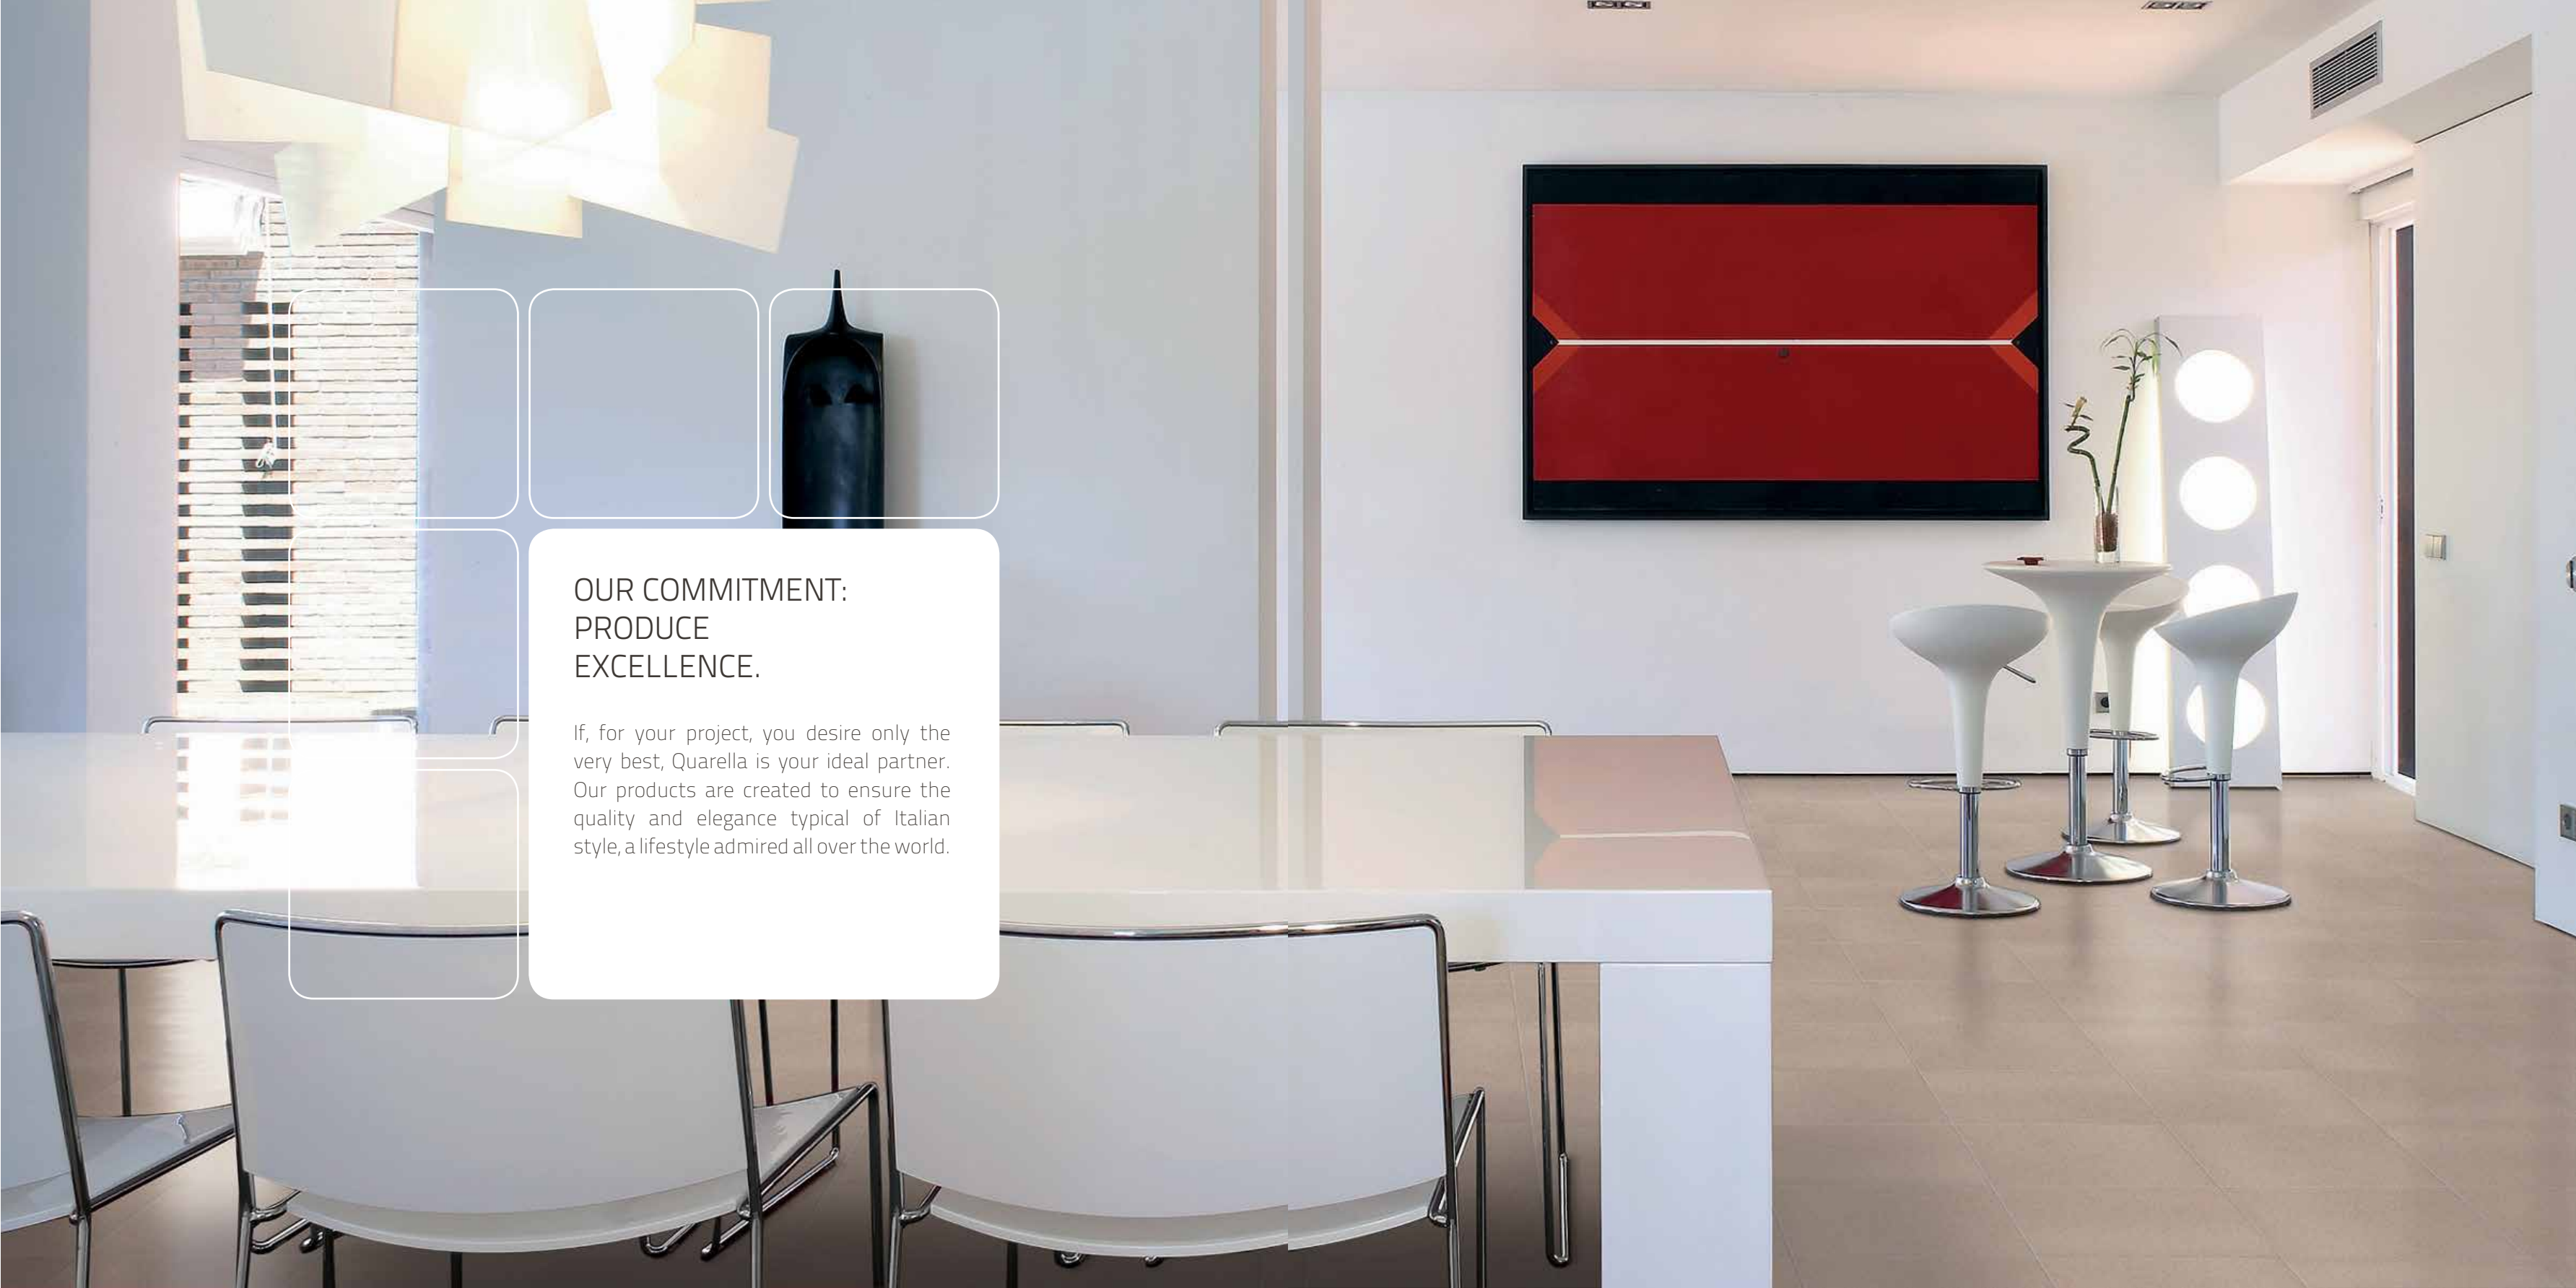

Knowing how to live is an art in which we Italians are masters. An art that comes from the ability to find beauty even in the smallest things, knowing how to maximize its benefits and, above all, knowing how to enjoy it in all its forms.

THE COLORS OF A
LANDSCAPE UNIQUE IN
THE WORLD.

Nature and history have painted in Italy landscapes that are unique in the world with colors and shapes that have inspired the greatest artists of all time and from whom we draw inspiration for the creation of our product ranges.

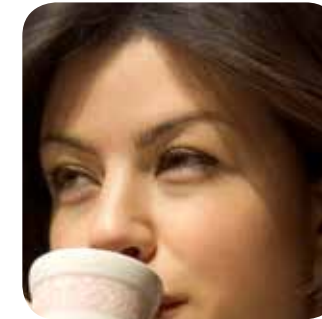

OUR COMMITMENT:
PRODUCE
EXCELLENCE.

If, for your project, you desire only the very best, Quarella is your ideal partner. Our products are created to ensure the quality and elegance typical of Italian style, a lifestyle admired all over the world.

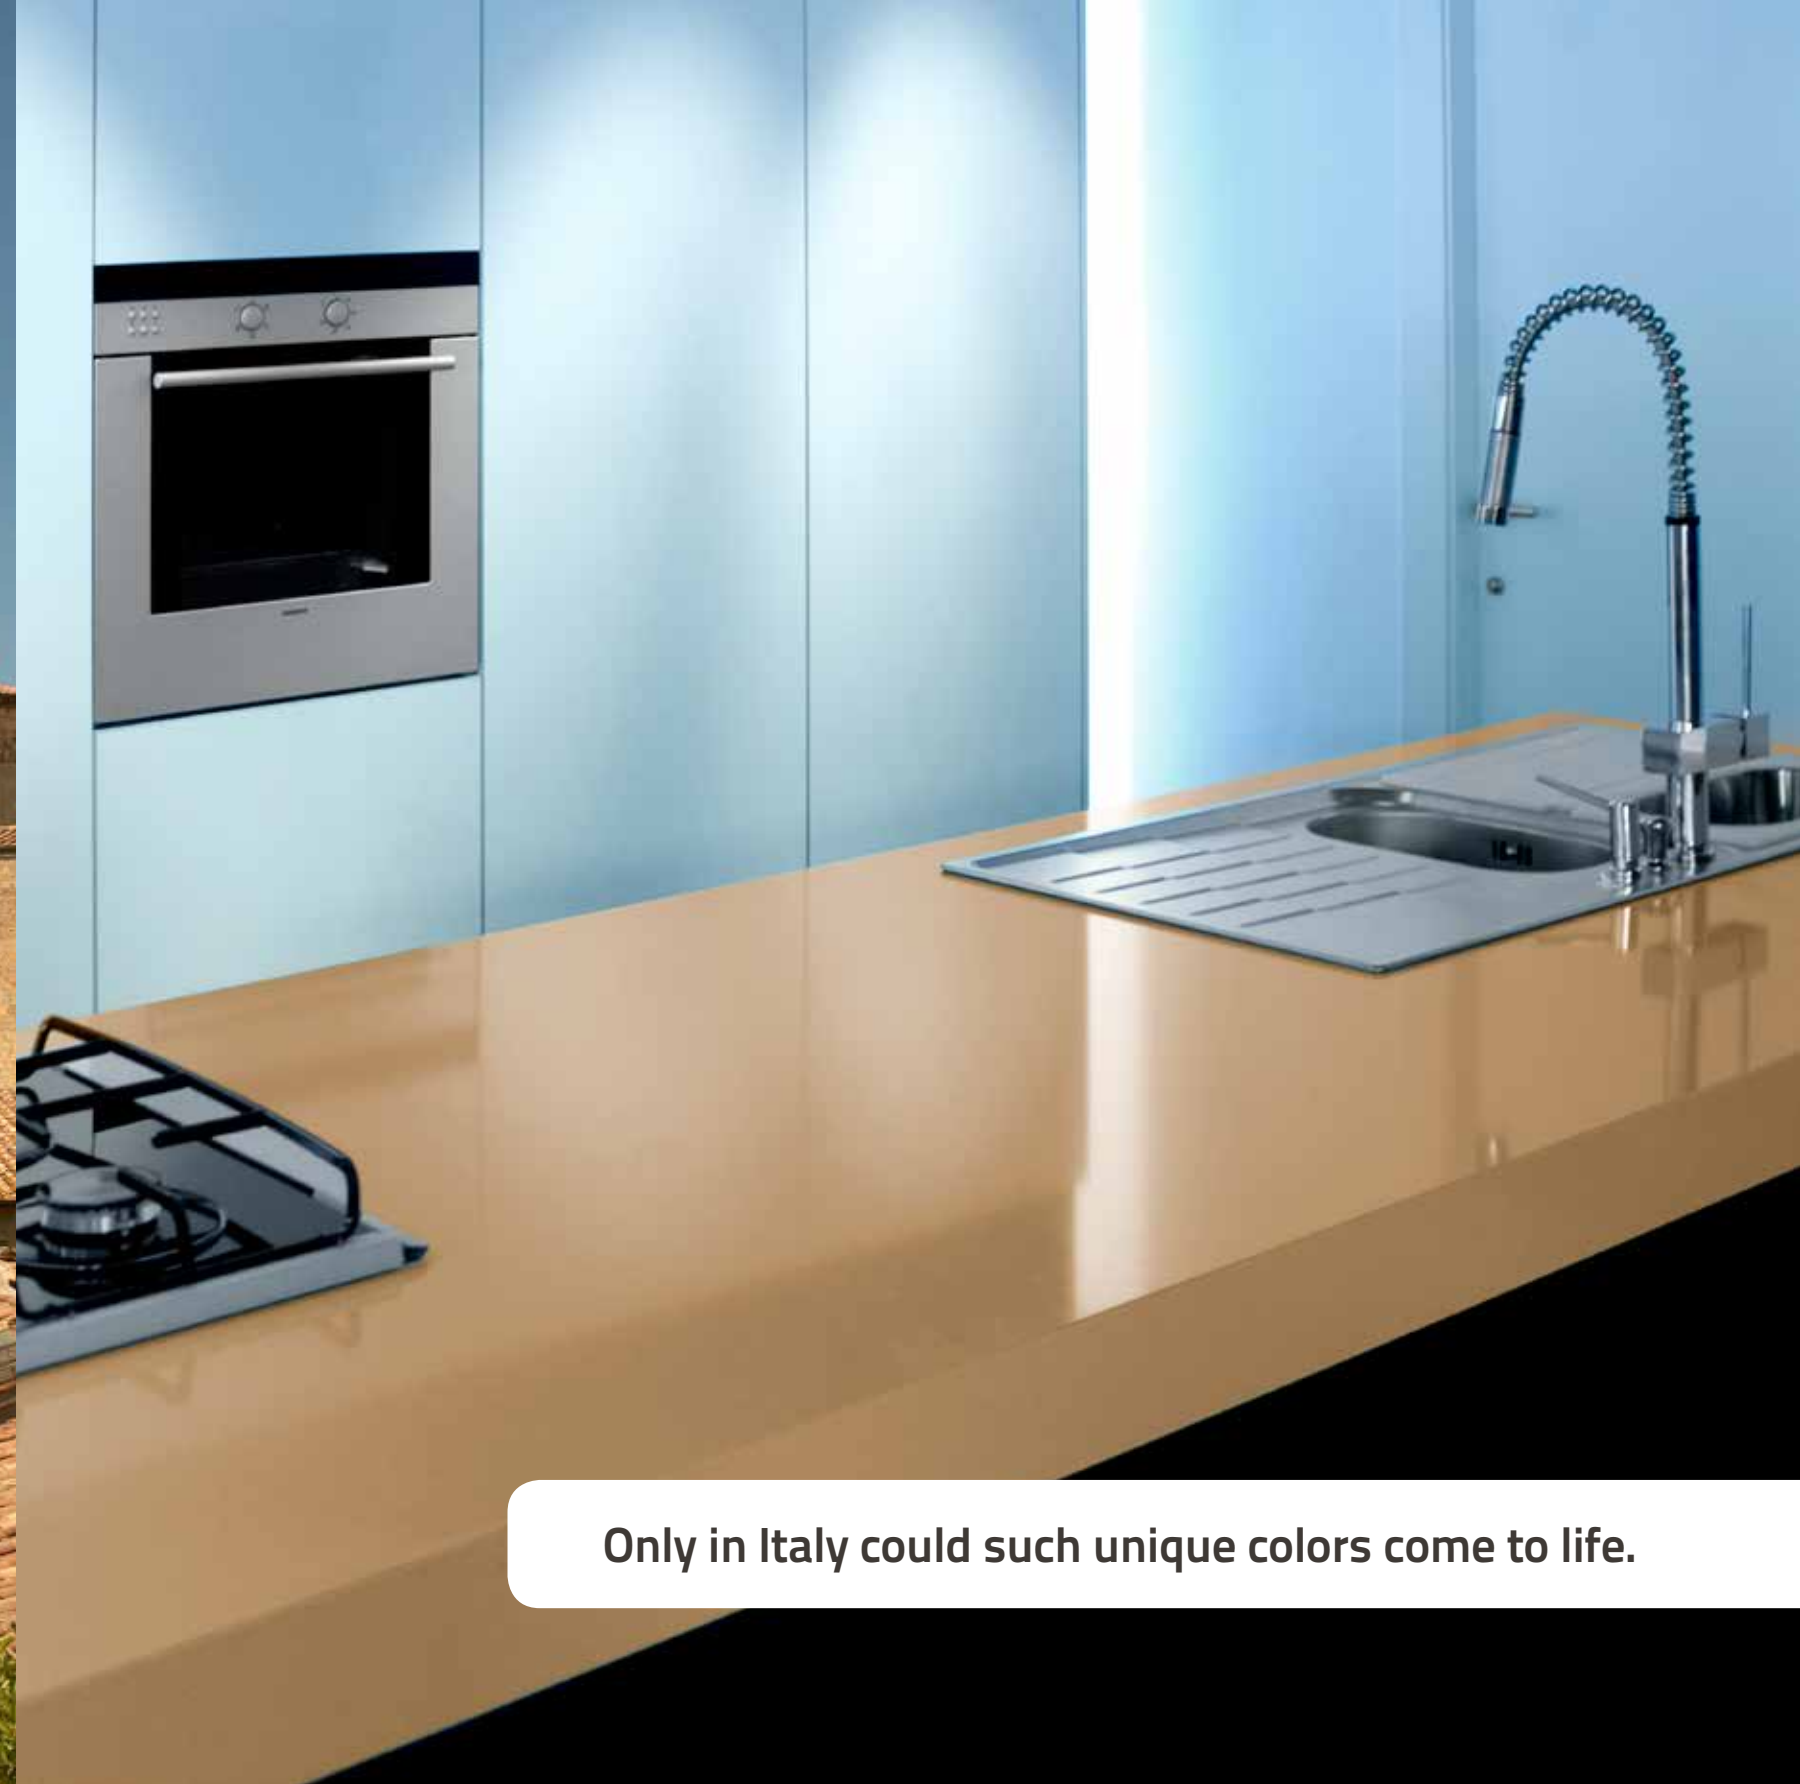

TECHNOLOGY AND
INNOVATION AT THE
SERVICE OF A UNIQUE
LIFESTYLE.

Quarella constantly innovates so as to give you the highest quality possible. Because a unique lifestyle always begins with the careful selection of the best solutions, always privileging the highest quality.

Stone surfaces for Italian lifestyle.

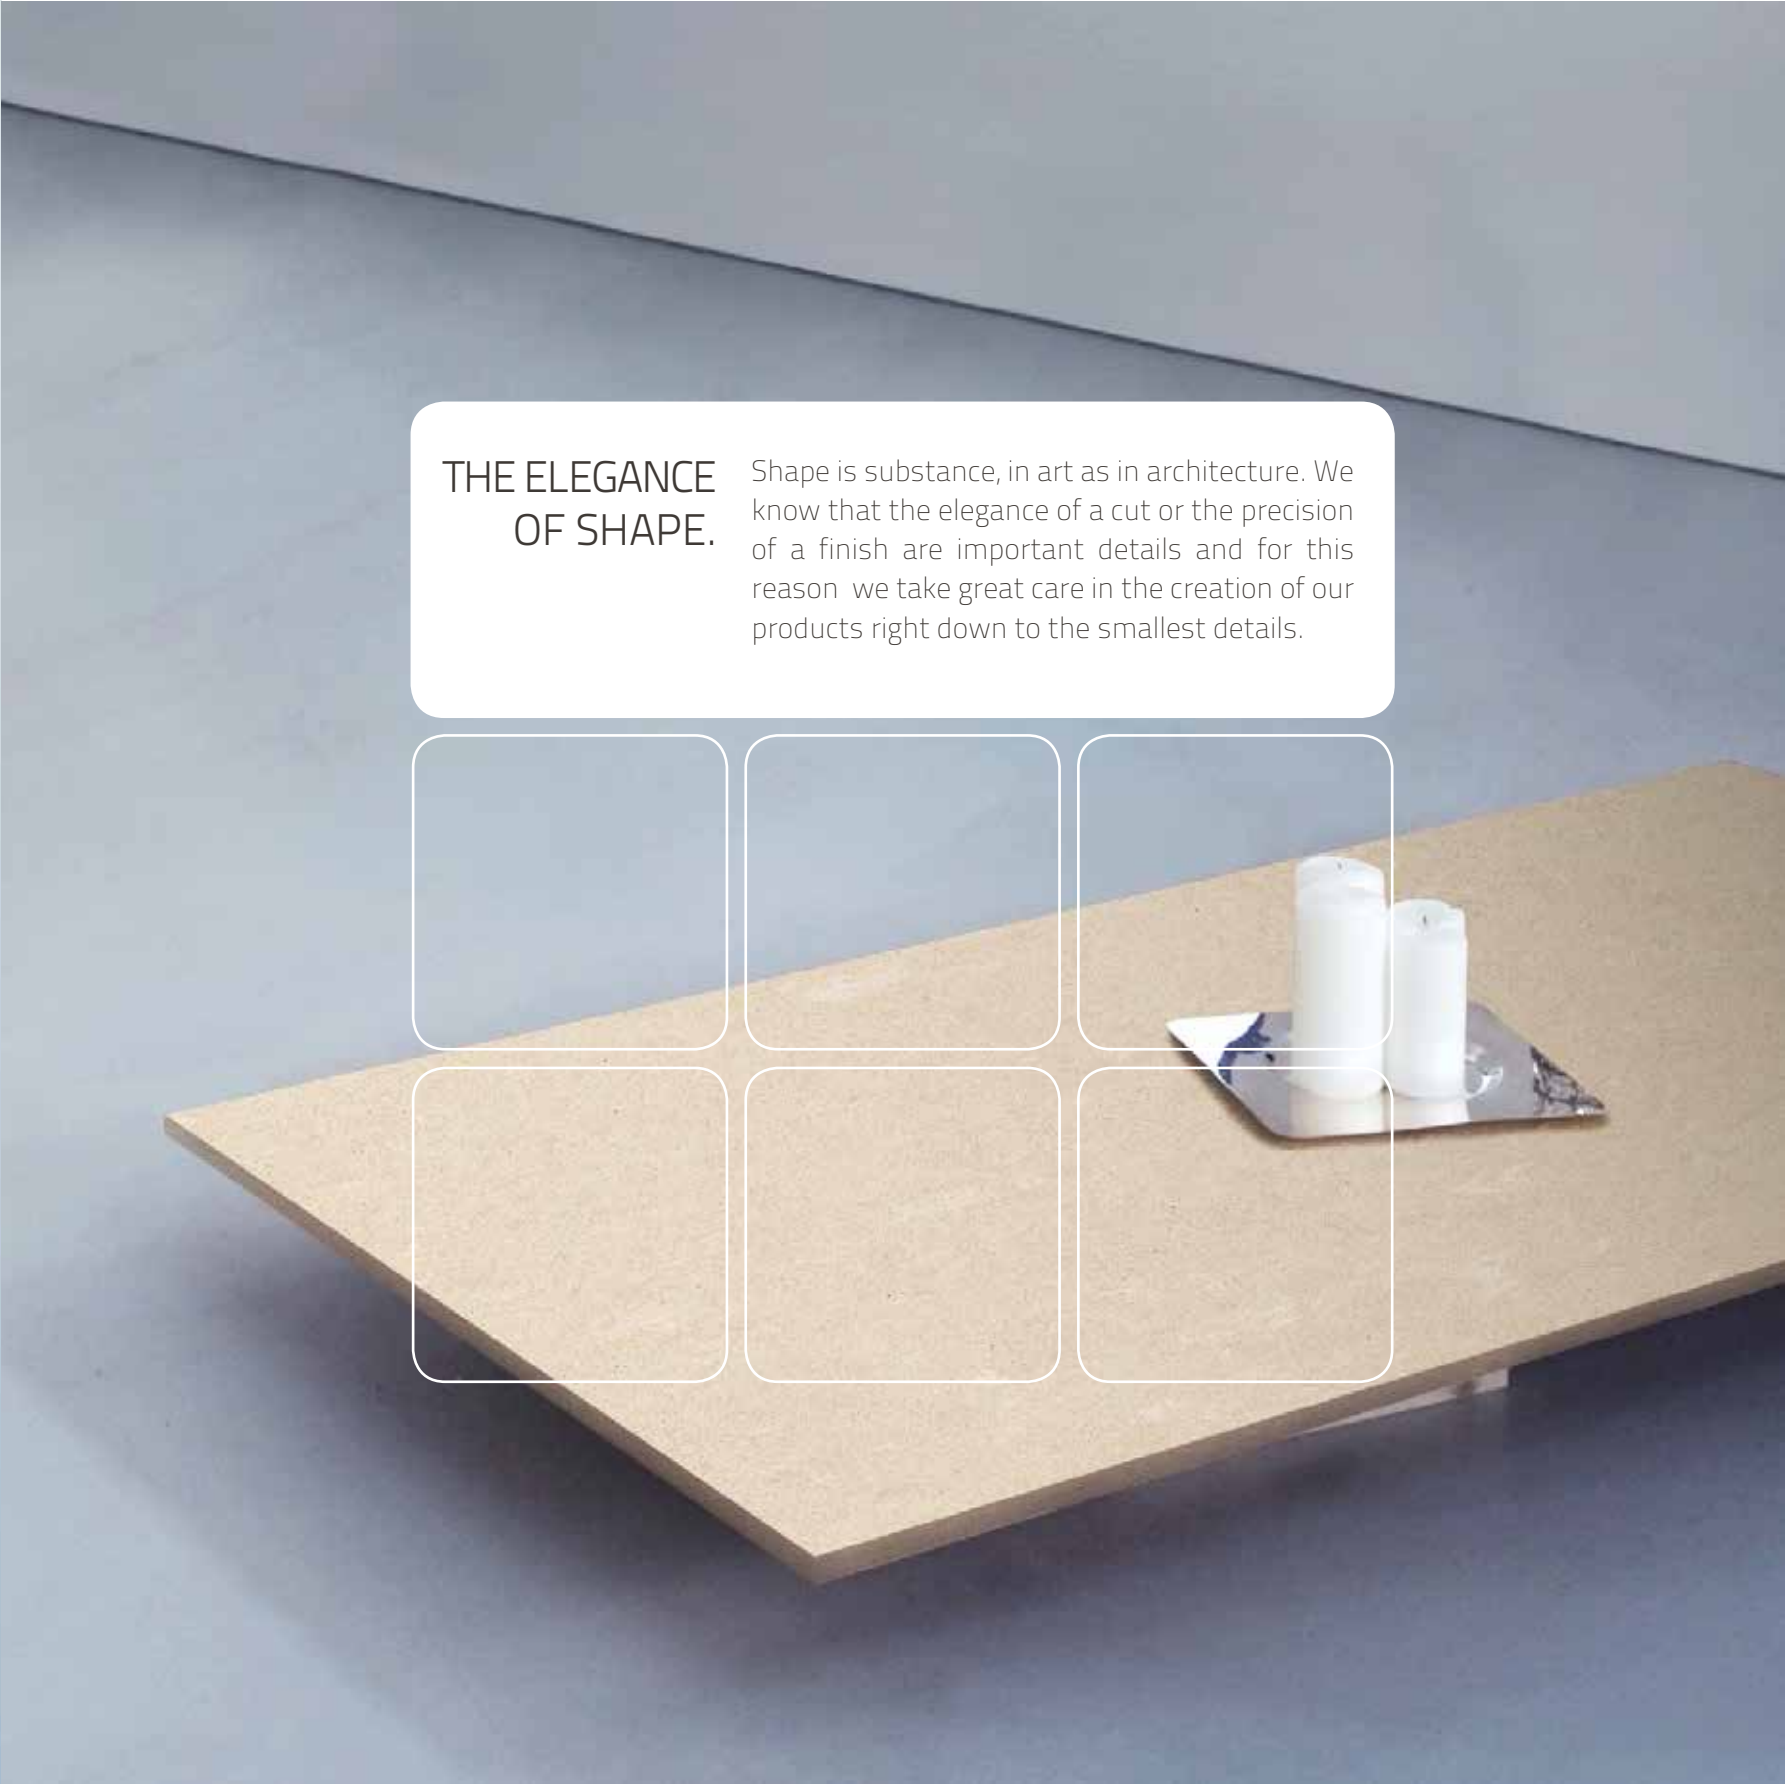

Only in Italy could such unique colors come to life.

THE ELEGANCE OF SHAPE. Shape is substance, in art as in architecture. We know that the elegance of a cut or the precision of a finish are important details and for this reason we take great care in the creation of our products right down to the smallest details.

PRODUCTS.

MARBLE

Flair

Tradizionale

We manufacture marble and quartz based composite stone. The marble based products are manufactured in blocks while the quartz based ones, due to their very high hardness, are produced in slabs. On our web site you will find all the relevant technical information and the full range of colors.

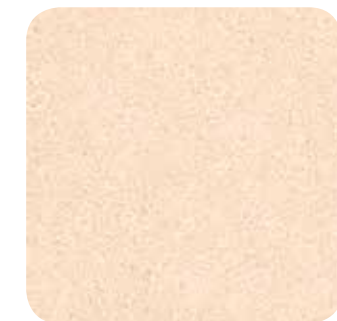

QUARTZ

Living

Evo

MARBLE Flair.

No country in the world more than Italy has defined the meaning of beauty. The Flair range is inspired by the colors and shapes of the Italian tradition and is ideal for designers and for those who dream of refined and embracing settings, in a classic and elegant style.

MARBLE Tradizionale.

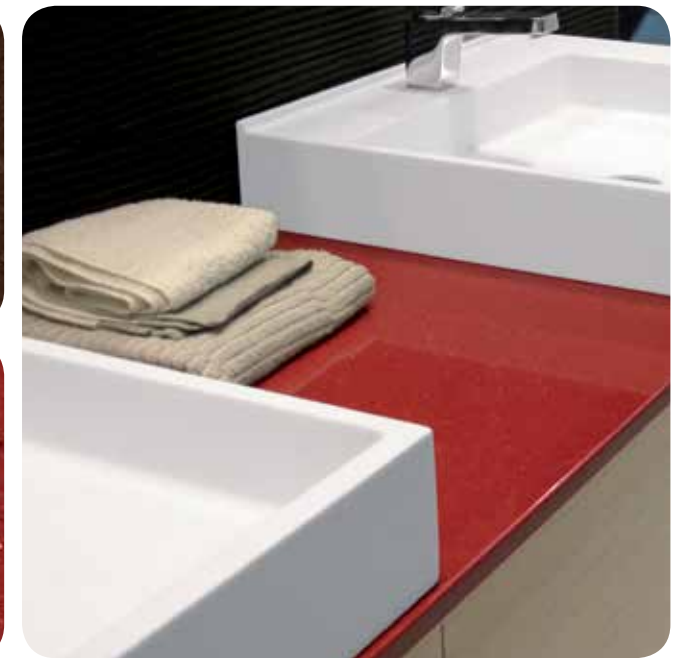

In the Tradizionale range Quarella's products reinterpret the colors and the veins of our natural stones. Rosa del Garda, Grigio Carnico, Rosso Asiago recall, simply by their names, the atmosphere and colors of our land, that come to life in your projects.

QUARTZ Living.

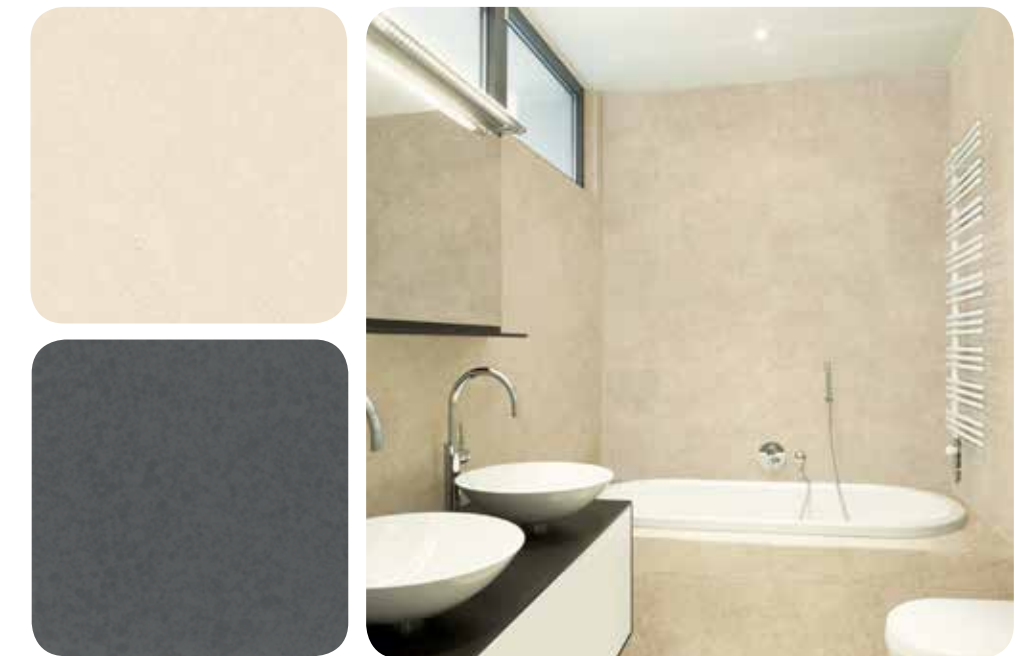

The strength of quartz is dressed in new colors in the Living range by Quarella: a range of distinctive and innovative chromatic proposals that captures and reproduces the unique light of our landscapes and the Italian style. A range that adds taste and elegance to all your conceptual proposals.

QUARTZ Evo.

The Evo range stems from production technology developed directly by the Quarella Research and Development Centre. Evo ensures the highest respect for the environment and the possibility to choose from a range of truly unique colors.

QZero.
ENVIRONMENTALLY
FRIENDLY TECHNOLOGY.

The environmental friendliness of Quarella products increases. QZero is the innovative manufacturing process that reduces to less than one hundredth the residual emission of VOCs (Volatile Organic Compounds). In this manner, the environmental impact is reduced both with respect to the finished products offered to the public as well as to the manufacturing phases of production, processing and disposal.

CERTIFICATIONS.

GREENGUARD certifies products and materials with low chemical emissions and provides a resource for choosing healthier products and materials for indoor environments. All certified products must meet stringent standards for chemical emissions based on criteria established by the major public health agencies.

For products intended to be used in schools, kindergartens or other environments where children spend significant periods of time, the GREENGUARD Children & Schools Certification Program offers even more stringent criteria.

GBC Italy adapts to the Italian construction market and promotes the independent certification system LEED®, Leadership in Energy and Environmental Design, whose parameters define precise criteria for the design and construction of healthy, energy efficient and environmentally friendly buildings.

NSF International is an independent, nonprofit, nongovernmental, global leader organization providing solutions for risk management, based on public health and safety in accordance with the interests of all stakeholders involved.

WWW.QUARELLA.COM

ALWAYS WITH YOU.

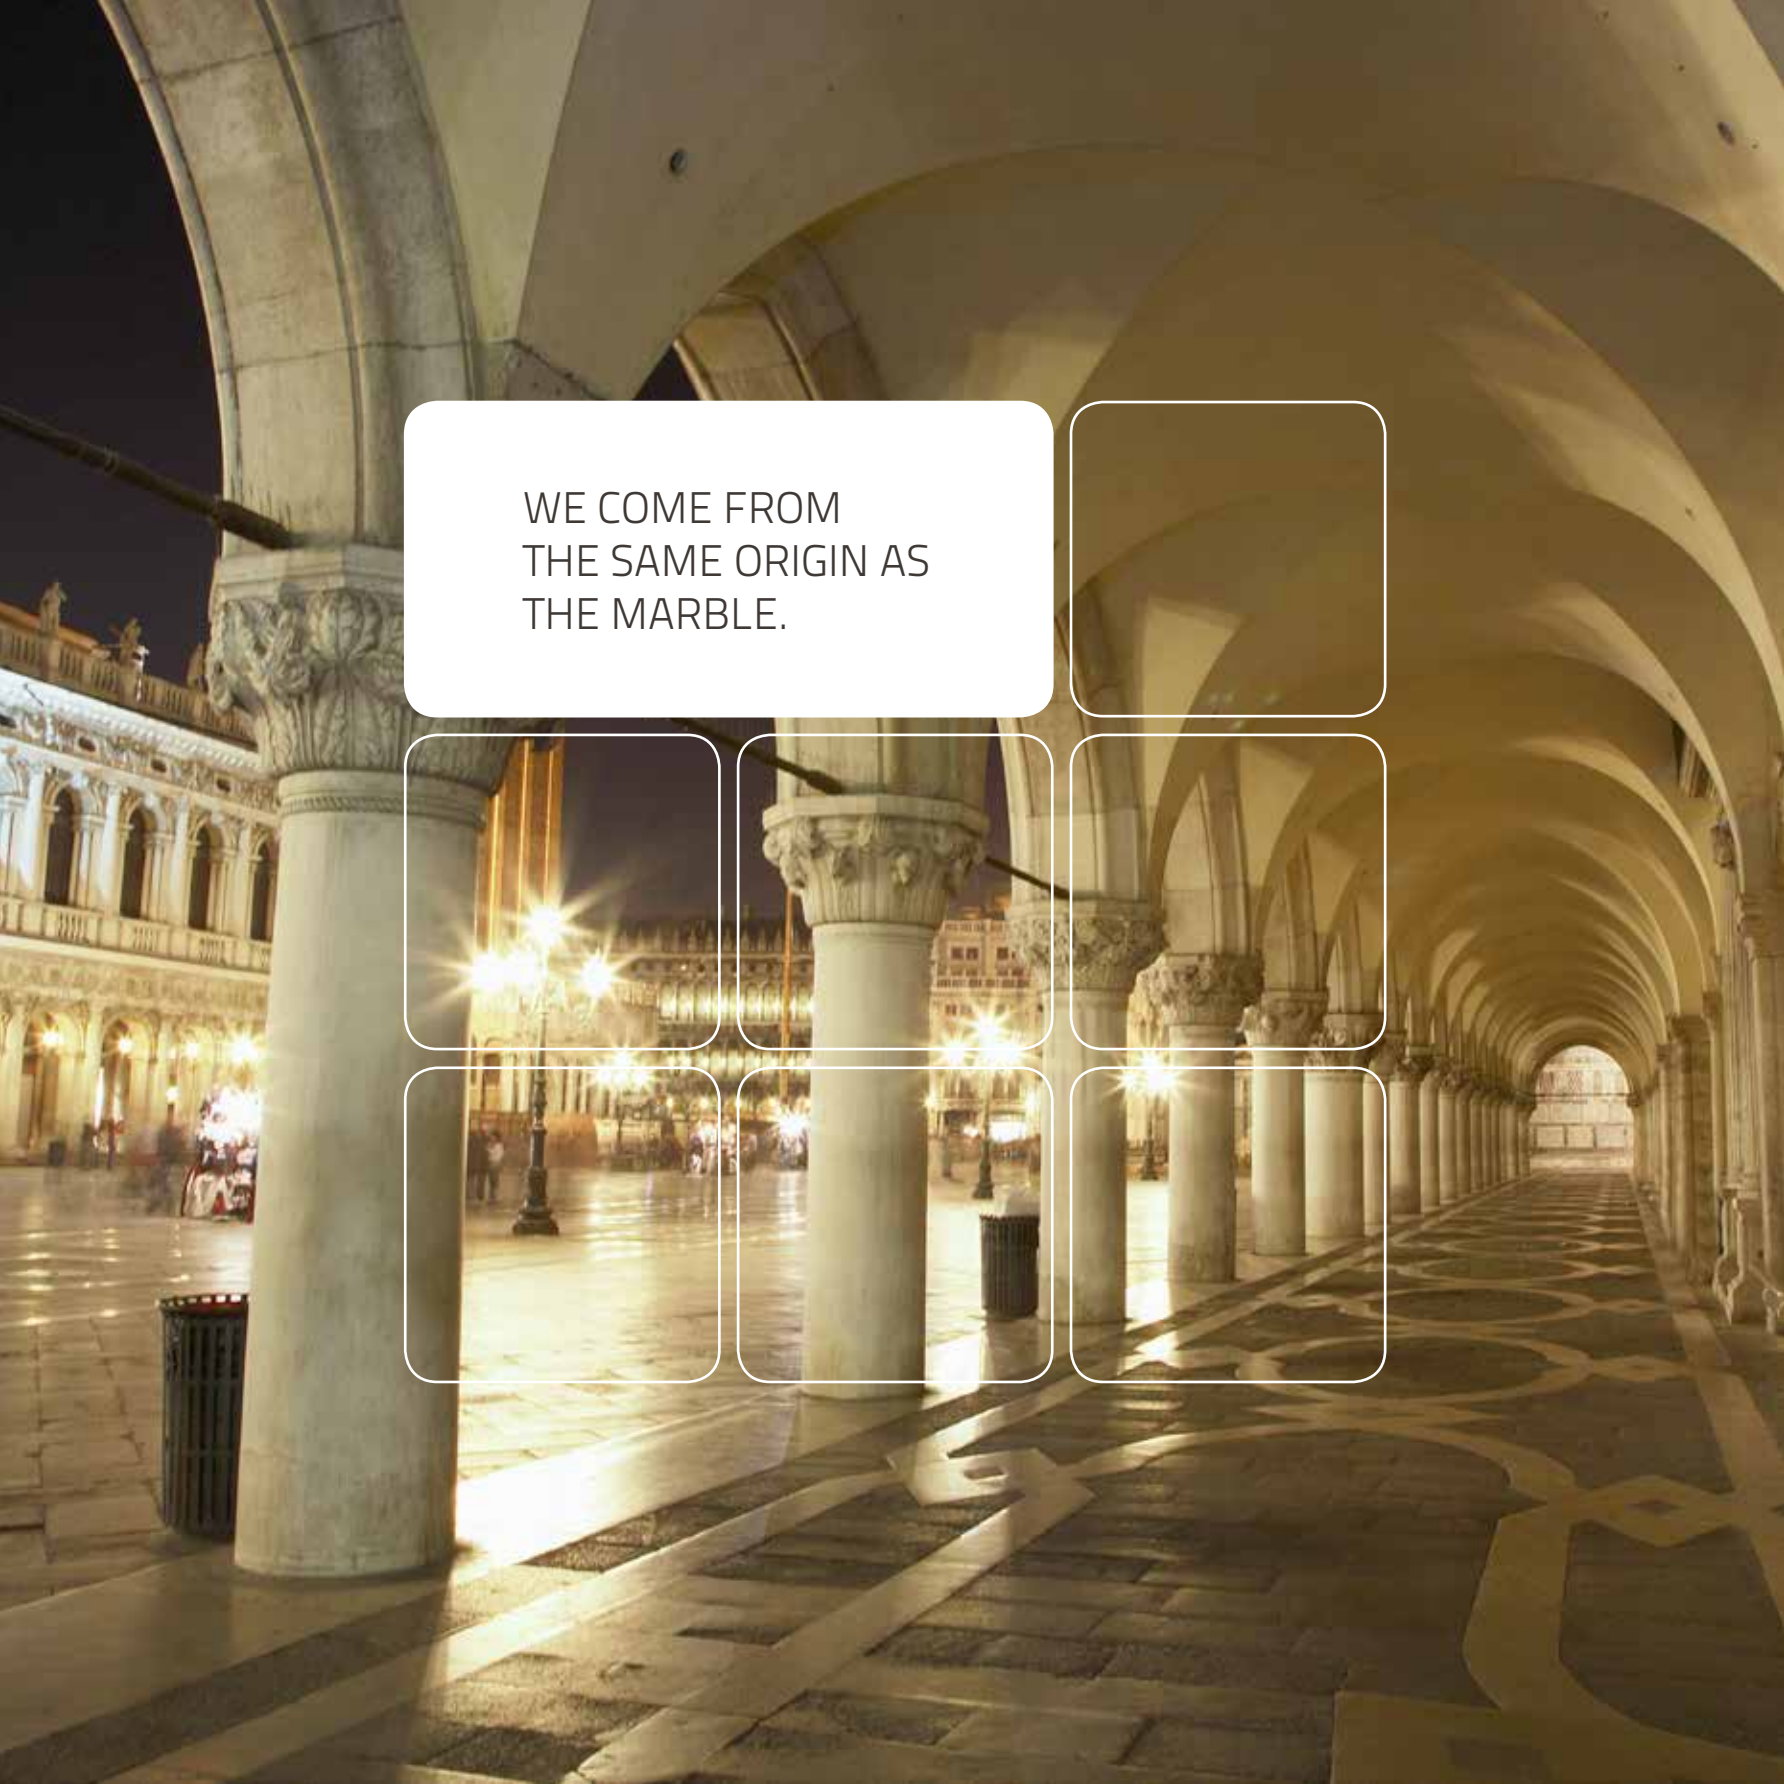

The Quarella website, www.quarella.com, is the reference point for anyone wishing to get in touch with us. Continually updated, easily accessible even on tablets, it provides comprehensive and immediate information on Quarella and our products.

CLOSER TO OUR CLIENTS.

For those like us who works side by side with architects and designers, it is essential to maintain an open channel of constant and ongoing dialogue with everybody. The latest media technologies allow us to stay closer to our customers and to offer them the best service in real time.

WE COME FROM
THE SAME ORIGIN AS
THE MARBLE.

THE VENETO REGION.

We are based in Verona, about 100 km from Venice, in a region of Italy known since Roman times for the quality of its marbles and natural stones. Today, the area around Verona is home to one of the most important marble and natural stone industrial districts in the world.

THE COMMERCIAL NETWORK: FROM ITALY TO THE WORLD.

From the beginning Quarella has exported its products worldwide. We service our clients in over 80 countries on 5 different continents, with a particularly strong presence in Germany, Holland, United Kingdom, China and Australia.

QUARELLA:
LEADERS FOR NEARLY
50 YEARS.

We were born in the mid 60's and for nearly 50 years we have been leaders in our market segment. Innovators from the beginning, over the years we have developed a technological capacity that, even today, makes our products a reference point for the whole market.

RESEARCH & DEVELOPMENT.

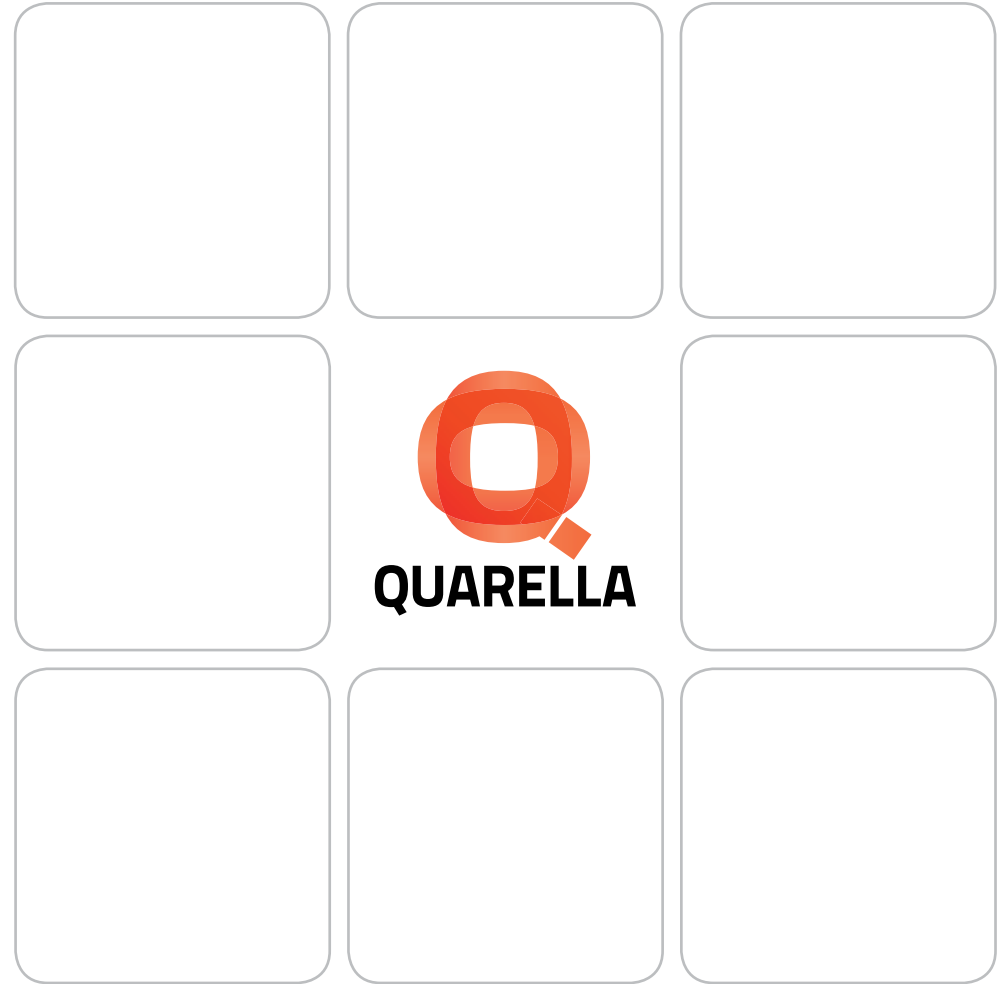

Continuous technological development and great attention to the environment: these are the guidelines on which our research and development proceeds. Day by day, our technicians work with the objective of achieving products with ever higher performance characteristics, paying great attention to the environment and to market trends in order to be the first to propose new concepts.

CUSTOM MADE PRODUCTS.

Our production lines can rapidly fulfill requests for special supplies. The whole company is always ready to offer technical advice and solutions for designing, engineering and carrying out special projects. We can develop for you custom made colors or make ad hoc supplies as well as assisting you in the execution of projects from airports and shopping centers or boutiques.
